

EGAT193

pH Combination Electrode with temperature sensor

EGAT193VP-X
Dimension in mm

This low maintenance pH combination electrode with gel electrolyte and large-sized ring shaped PTFE junction features application under industrial conditions in water technology, sewage treatment, electroplating and process chemistry. The incorporated temperature probe allows simultaneous measurement of pH and temperature especially for automatically temperature compensated pH measurements.

In addition to the version with plug head system and separated cable connection, models with fixed cable are available.

The model EGCT193 with alkaline resistant high temperature glass (HT) features application for continuous measurement in mediums with higher temperature and extreme pH.
